

Appendix – A

2003 Hopi AML Photos –

Keams Canyon Coal Maintenance Project: This portal had been reopened by settling of backfill material. Hopi AML designed and installed a permanent concrete closure. Portal is next to a highway and several homes and was a SMCRA, priority-1 hazard.

Final stages of the Kykotsmovi Sewage Lagoon / Wetland Treatment System.

Kykotsmovi Sewage Lagoon Treatment System:
One of the Primary Treatment Sewage Lagoons is shown here.
Several homes serviced by the facility are visible in the background.

Spider Mound Water Well Project:
Hopi AML drilled and developed the well to provide a source of drinking water.
IHS will develop a purification / treatment station and supply lines to the well.

Kykotsmovi Wildland Fire / Emergency Medical Station Project:
This Fire/EMS station serves the western portion of the Hopi Reservation.
The building construction began in 2002 and was completed in 2003.
