

NHANES 1999-2000 Data Release File List

This document contains information on files that are part of the June 2002 and February 2003 NHANES 1999-2000 data release. The data files are in SAS transport file format and have been separated to facilitate faster access over the Internet. As noted below, several files are only available through the [NCHS Research Data Center](#) due to data sensitivity or confidentiality. The following tables describe all of the NHANES 1999-2000 data files that have been released. The following definitions describe the columns in each of the tables:

- Contents: a short description of the contents of a file
- Release date: date the file was released to the public on the Internet.
- FTP file: the name of the file on the CDC FTP server that can be downloaded to your machine. Please note that in many cases this file is a self-extracting zip file. These files have an '.exe' as the file extension. The zip files contain an SAS transport file, codebook, frequency files, and documentation related to the dataset of interest.
- Data file: the name of the SAS transport file containing the actual data.
- Codebook file: the name of the file containing item names, descriptions, question text, response categories, valid values and other information.
- Documentation file: the name of the file containing the complete documentation on the relevant exam component, laboratory tests, or questionnaire section.
- Frequency file: the name of the file containing raw frequency counts for all items in the data file.
