See next page for description

## Voice Mail

Voice Mail is an available subscription service that assigns a voice mailbox to a telephone extension. The associated equipment is coresident with, and connected to, the BNL telephone switch. When a user's telephone is busy or not answered, the caller receives a welcome message recorded by the user and is asked to leave a message. System users can save, delete, or redirect stored messages. Users can access their mailbox from any tone phone, on- or off-site. Special application services are also available.

To activate a new voice mailbox:

- Dial 7500
- Press # and enter your mailbox number. (In most cases, your mailbox number is the same as your extension).
- You then will be asked to enter the temporary password that was assigned to you. (The password is always the same as the mailbox number).
- You then will be prompted to change the password, say your name, and enter your mailbox greeting. It is strongly recommended that you use a personal greeting for your voice mailbox.

For new users, speak to your Telephone Service Representative so that they may call Telecom Services to request voice mail for your extension. For additional information, please refer to page i for a diagram or call the Telecom Services office at Ext.7099 for assistance.

# BROOKHAVEN NATIONAL LABORATORY TELECOMMUNICATIONS SYSTEM

## ITD TELECOMMUNICATIONS MISSION STATEMENT

"To strategically position the telecommunications organization as a highly technical customer focused support center, viewed in the eyes of our customers, both internal and external, as the cornerstone in the ever changing environment of business technology."

The Telecommunications Services Section of the Information Technology Division (ITD) manages telecommunications at BNL. Avaya has been contracted to provide management services as well as adding, changing, and relocating station apparatus and remote operator assistance. Siemens Business Communications provides contracted telephone services, such as maintaining the telephone system. Buildings housing scientific or administrative personnel are provided with digital telephone service. All other buildings have analog telephone service.

**Telephone service is provided for the conduct of official business. Use of government-provided services for personal business is prohibited by law and may result in the suspension or dismissal of an employee.**

The following information will acquaint employees with the available services. Additional information can be obtained from Telecom Services, Ext. 2000.

## GENERAL TELEPHONE INFORMATION

BNL is located within area code 631 and our exchange is 344 for all business areas of the Laboratory, as well as the on-site housing area.

BNL's main number (631) 344-8000 is answered by Avaya Call Center Operator between the hours of 8:00 AM and 6:00 PM.

When operators are not on duty, incoming calls are answered with the following recording:

"This is the Brookhaven National Laboratory. Laboratory operators are not on duty at this time. Normal switch board hours are from 8:00 AM to 6:00 PM, on working days. Your call should be placed again during those hours. If this is an emergency call 631-344-2222. For information on Laboratory closings dial 631-344-INFO."

The telephone number 344-INFO is a general information recorded message (emergency closings, general announcements.

## TELEPHONE SERVICE REPRESENTATIVES (TSR)

Each department has an assigned Telephone Service Representative (TSR). They are the contact for any changes to the telephone system. Please refer to the ITD Home Page on the World Wide Web (www). An updated list of TSRs can be found at

[http://www.ccd.bnl.gov/phone\\_system/tsr.txt](http://www.ccd.bnl.gov/phone_system/tsr.txt)

## CLASS OF SERVICE

Each telephone extension at BNL is assigned a class of service (COS) appropriate to the user's needs. A COS designates the level of off-site access available, as shown below:

**COS 50** Provides unrestricted access to  
- All 631 & 516 Area (Long Island)  
- All U.S. Area Codes  
- International Calling via AT&T  
- 800 Numbers  
- Cablevision Lightpath Operator

**COS 40** Provides access to  
- All 631 & 516 Area (Long Island)  
- All U.S. Area Codes  
- International Calling via AT&T  
- 800 Numbers

**COS 30** Provides access to  
- All 631 & 516 Area (Long Island)  
- All U. S. Area Codes  
- 800 Numbers

- COS 20** Provides access to
  - All 631 & 516 Area (Long Island)
  - Metro N.Y. City, 212, 718
  - 800 Numbers
- COS 10** Provides access to
  - On-site extensions only and can receive off-site calls
  - 800 Numbers
- COS 5** Provides access to
  - On-site use only; placing and receiving internal calls
- COS 45** Provides access from APARTMENT AREA phones to
  - Domestic U.S. calling
  - International calling

COS Options 20 through 50 are available with the privacy feature which prevents Automatic Camp-On or Executive Override from interrupting your call. It also prevents someone with the same line extension from entering your call.

## **PLACING CALLS - GENERAL**

### **On-site Calls**

Laboratory employees are reached by dialing the 4-digit numbers listed in the directory.

### **Off-site Calls**

Off-site access is determined by the COS assigned to the phone on which the call is placed (see above). Local calls (Area Code 631) are placed by dialing the access code "9" followed by 7 digits. Long-distance calls to all other areas are placed by dialing access code "9" + "1" + Area Code followed by 7 digits.

### **Personal Calls**

Use of the Laboratory phones for personal calls is limited to necessary ones that cannot be made elsewhere or at other times. Supervisors are responsible for minimizing time spent on personal calls during working hours. Employees are encouraged to use one of the pay phones on site for personal calls.

Operators will not place personal calls. All personal calls not covered by the policy stated above must be made at the employee's own expense. Employees must use a credit card, calling card, or prepaid calling card.

### **Credit Card and Collect Calls**

Credit Card or Collect Calls may be placed by dialing the appropriate 1-800# of an interchange carrier:

- 1-800-CALLATT for AT&T collect or credit card calls
- 1-800-COLLECT for MCI collect or credit card calls
- 1-800-OPERATOR for AT&T collect calls

### **Information Calls**

Several free information services are available on the Internet; [www.555-1212.com](http://www.555-1212.com) or [www.switchboard.com](http://www.switchboard.com) are two popular ones. They should be tried before using information services that charge. They give both residential and business information as well as websites, 800 look-ups, and e-mail addresses.

- Local information (COS permitting); dial 9 + 555-1212 (\$.45/call)
- Long-distance information; dial 9 + 1 + Area Code + 555-1212 (\$.75/call)
- Toll-free information; dial 9 + 1 + 800-555-1212 (no charge)

### **Incoming Collect Calls**

Only OFFICIAL incoming collect calls may be accepted. The operator will not accept any collect calls.

### **International Calls**

Dial 9 + 011 + Country Code + City Code + Local Number. These calls can be placed on phones with a COS of 40 thru 50 only.

## ABOUT BNL TELEPHONES

### Telephone Instrument Types

Digital Instruments - Three models are available:

- 312 - Basic single-line instrument- One line plus 9 programmable keys
- 612 - Multiline instrument- Up to 5 lines plus programmable keys
- 624 - Multiline instrument- Up to 11 lines plus programmable keys

All digital instruments have a one-way speaker for on-hook dialing and may be equipped with a Display. The 612 and 624 may be expanded by 20 additional keys with the KEO Option, and also may be equipped with a speakerphone.

Analog instruments - Both single-line and multiline (legacy) instruments will continue to be available in analog buildings. A limited number of analog single-line instruments and lines are available in digital buildings to support FAX machines and plant equipment. Multiline analog instruments are not available in digital buildings.

### Users of digital telephones may

- select from 8 ringing tones to distinguish their phone from others (see instructions under "Changing Ring Tone", below).
- adjust the volume of the ring (slide control under phone).
- adjust the receiver volume of the current conversation (up/down buttons on set). The volume returns to a preset level upon completing the call.

All telephones are hearing-aid compatible.

### Distinctive Ringing

Calls from off-site to all digital and single-line analog instruments will generate a rapid ring (1 sec. on, 1 sec. off). On-site calls generate the normal ring (1 sec. on, 4 sec. off). The exception to this is the multiline analog instruments which produce the normal ring for all calls.

### Changing Ring Tone

When first installed, your ROLM phone will have a predetermined ring tone. You can change your phone's tone to any one of eight settings:

- Get dial tone.
- Key in \* 5 7 2.
- Your phone will ring with its predetermined tone. You can sample each of the different tones by pressing keys 1 through 8 on the dial pad.
- When you find the tone you like best, press the line key or hang up the handset. Your phone now will ring, each time, with the new tone you selected.

## TELEPHONE SYSTEM FEATURES

Most features are available from either digital or analog instruments. Digital instruments may access several of the system's features using a single key. The number of such keys available depends on the type of telephone set and number of lines it can pick up. Because of the difficulty in maintaining the large number of combinations of single-button features possible for each type of set, 35 standard ones were selected and should serve most needs.

Instructions are given for using the system's features from both digital- and analog-stations. Users with analog telephones or digital telephones without sufficient unused keys to activate the single-button feature must use the dial keypad to enter the command codes (e.g., ##9, FLASH, \* 6, #7) to activate the system's features. To signal the FLASH from an analog set, the hookswitch must be used. The hookswitch is controlled by the two buttons under the handset's cradle. Press the hookswitch down for about 1/2 second and release it.

All digital telephones have LINE, FLASH, HOLD, TRANSFER, and CONNECT buttons which are used as follows:

(Alternate instructions are given for analog phones)

LINE - Digital phones have no mechanical switchhook. The phone is activated by either removing the handset or leaving it seated and pressing the LINE key. The latter method permits "hands free" dialing as the one-way speaker enables the caller to hear tones and the answering party. The handset must be removed to converse with the called party.

FLASH - The FLASH key places any call you have in progress on temporary hold and alerts the system that you wish to access a feature or dial a second party. You only need to use the FLASH key to activate a feature key on your phone when you have a call in progress (Analog: press & release hookswitch).

HOLD - HOLD lets you temporarily hang up a line without disconnecting the other party. If you want to make another call after placing a call on hold, you must use another line.

To put a call on hold:

- Press the Hold (HOLD) key.
- If you were using the handset, you can hang up. The status light beside the line key blinks to remind you that the call is on hold. You can put only one call on hold per line.
- From analog stations: FLASH,\* 9

To connect to the call again:

- Press the line key next to the blinking status light, or pick up the handset and press the line key.
- If your phone has only one line, do not press the line key after picking up the handset – doing so hangs up.
- From analog stations: \* 1

If you do not pick up the call after approximately 5 minutes, your phone will ring. If you do not answer it, the call is transferred to the operator.

TRANSFER -Transfer lets you move a call to another extension, or to the operator.

To transfer a call to another extension:

- Ask the caller to wait.
- Press the Transfer (XFER) key. The Call Waiting (CALL WTG) status light blinks.
- From an analog station: Flash, \* 7
- Dial the extension you want.
- When the party answers, announce the call and hang up.

If you can't make the connection because of a busy line, no answer, or the party will not accept the call:

- Press the Connect (CNCT) key to reconnect with the original caller.
- From an analog station: \* 1

CONNECT - Connect allows you to do the following:

- Accept a call that has been automatically camped on to your extension.
- Connect with an external line after you receive a callback.
- Reconnect with a transferred call.
- Alternate between two parties.

To use the Connect feature:

- Press the Connect (CNCT) key.
- From analog stations:\* 1

**THE FOLLOWING FEATURES MAY BE ACTIVATED BY A SINGLE BUTTON  
ON A DIGITAL SET (IF SO EQUIPPED) OR VIA THE INDICATED CODES**

### **Call Forwarding**

Call Forwarding lets you temporarily redirect your incoming calls to another extension.

To use the feature:

- Get a dial tone.
- Press the Call Forwarding (FORWD) key, or dial # 9.
- Dial the extension that you want to receive your calls.
- Hang up. The line key status-light flickers to let you know your extension is forwarded.

To cancel:

- Get a dial tone.
- Press the Call Forwarding (FORWD) key, or dial # # 9.
- Hang up.

## Call Park

Park lets you transfer a call to an extension and hold it there. The call won't ring at that extension. This feature is useful when you want to continue a conversation at a different extension or transfer a call to a busy extension.

To use the feature:

- Press the Park (PARK) key, or dial FLASH \*6.
- Dial the extension.
- Listen for the internal dial tone.
- The phone won't ring at the other extension, but if the extension is busy, the person will hear a short beep and their Call Waiting status light will turn on. The call will be on hold.
  
- To connect to a Parked Call:  
If the line is free, press the line key at the extension where the call is parked.  
If the line is in use, press the (CNCT) key (or dial FLASH #1) to connect to the parked call.

## Camp-on with Callback

Camp-on with Callback automatically calls you back with two long rings when the busy extension you are trying to reach becomes free. When you answer, you will hear the extension you called begin to ring.

To camp on to a busy extension:

- Listen for the busy signal.
- Press the Camp-on (CAMP) key, or dial FLASH # 1.
- Listen for the internal dial tone.
- Hang up.

To cancel:

- Get a dial tone.
- Press the Camp-on (CAMP) key, or dial # # 1.
- Hang up.

## Conference Calls - 8 Party (Set up by users)

Conference calling allows up to 8 parties to participate in a telephone conference. If more than 2 of these parties are outside BNL, voice volume may be degraded.

To use the feature:

- Press the Flash (FLASH) key to put the first party on hold.
- Dial the next party.
- Inform them that this is a conference call.
- Press the Conference (CONF) key, or dial FLASH \*4 to join all parties.
- To add another party, press the Flash (FLASH) key and dial the next party, then press the Conference (CONF) key, or dial FLASH \*4 to join all the parties.
- To reconnect to the conference if a called party doesn't answer, press the Connect (CNCT) key or dial \*1.
- To drop the last party added, press the Flash (FLASH) key, and then dial \*\*4.

## Conference Calls - 12 Party (Set up in conjunction with the BNL Operator)

Up to 11 parties may be off-site.

To use feature:

- Call the BNL Operator to confirm that the desired time is available. The conference call will be tentatively scheduled at that time. You will be given an extension number to access the conference feature.
- This must be followed by a memo sent to Telecom Services, Bldg. 515 or faxed to X7688.
- To activate your conference you must call each participating party and transfer them individually to the extension you were given.
- You may also provide them with the extension number and have them call that extension directly.

## Consultation Call

Consultation Call lets you talk privately with a second party while the first party is on hold.

To consult with a second party during a call:

- Press the Flash (FLASH) key.
- Dial the number of the second party.
- Talk with the second party.

To reconnect:

- Press the Connect (CNCT) key, or dial FLASH \* 1.
- You can use CNCT to go back and forth between parties.

### **Message Waiting Indicator**

The Message Waiting Indicator (MSGWTG), available on digital phones, will light up to alert you that there is an unheard message in your voice mailbox. The key next to MSGWTG is "Station Speed Dial 0" and may be programmed to dial the Voice Mail access number 7500 or 4500. It cannot be programmed to dial the complete telephone number and password sequence. The Message Waiting Indicator will remain lit until you listen to your messages, and then it will go out.

To set station speed code 0 for voice mail :

- Get a dial tone.
- Press the Station Speed (STASP) key twice, or dial # # 3.
- Dial the station speed code "0".
- Dial the extension number for voice mail (4500 or 7500).
- Hang up.

To make a station speed call to voice mail:

- Get a dial tone.
- Press the MSGWTG button.

If you have programmed 4500, you will be prompted to enter your password. If you have programmed 7500, you must press # and enter your mailbox number before being prompted to enter your password.

In addition to the Message Waiting Indicator, a Stuttered Dial Tone will notify you of new messages. The Stuttered Dial Tone is the only indicator of Message Waiting on analog telephones.

### **Pickup**

Group Pickup lets you answer (intercept) any ringing phone in a designated group of phones in your work area, without knowing the number of the ringing phone.

Call Pickup lets you answer a call to any extension, if you know its number. You also can use this feature to pick up calls that are on hold at another extension.

To use Group Pickup:

- Get a dial tone.
- Press the Pickup (PICK) key twice, or dial \*:\* 3.

To use Call Pickup:

- Get a dial tone.
- Press the Pickup (PICK) key, or dial \* 3.
- Dial the number of the ringing extension or the extension on hold.

### **Queuing with Callback**

Queuing with Callback puts you in an automatic waiting line for the next available outside line when all outside lines are busy. You will hear a fast busy signal when all outside lines are busy. Callback queuing automatically calls you back (with a long ring) when an outside line becomes free.

To queue for an outside line that you have dialed:

- Listen for the fast busy signal.
- Press the Camp-On (CAMP) key, or dial FLASH # 1.
- Listen for the internal dial tone.
- Hang up. (If you used your primary line to queue, its status light will remain on).

To accept a callback:

- Listen for the long ring tone.
- Lift the handset.
- Listen for the high-pitched holding tone.
- Press the Connect (CNCT) Key or dial \* 1. The system automatically places your call.

## Repertory Dialing

Repertory Dialing lets you access a feature and dial a telephone number by pressing one key. Any unprogrammed key, which appears on an RP624 instrument can be a repdial key. You can program a repdial key to perform a sequence of commands or call a frequently dialed telephone number.

To set up or change a repdial key to perform a command sequence:

- Get a dialtone.
- Press the Set Repdial (SET) key, or dial \* 5 6 6.
- Press the repdial key that is to be set.
- Dial the digits and press the feature keys (or feature codes) for the desired sequence.
- Hang up.

Note: To enter a delay to allow time for processing, press the Hold key.

To make a repdial call:

- Press the desired repdial key. The phone will automatically select a line and dial for you.

OR

- Press a line key.
- Press the desired repdial key.

You can program an available repdial key to dial into the voice mail system, access your voice mailbox, enter your password and get you messages.

## Save/Repeat

With Save/Repeat, you can ask the system to remember (save) an internal extension or outside telephone number (up to 16 digits) that you want to redial later. You can use this feature after receiving a busy signal, before the call is answered, during the conversation, or just before you hang up once the called party has done so.

Note: You can save only one number at a time from any one line on your telephone. Each time you save a number, you erase the one previously saved.

To save a telephone number:

- Get a dial tone.
- Dial the extension number, or dial 9 and the outside number.
- Press the Save/Repeat (SVRPT) key, or dial FLASH # 4.
- After you complete your conversation, hang up.

To call your saved number:

- Get a dial tone.
- Press the Save/Repeat (SVRPT) key, or dial # 7.

## Station Speed Calling

Station Speed Calling lets you set up single-digit codes for your frequently called internal extensions and outside numbers. You then can dial a one-digit code instead of dialing the whole number.

To set or change a station speed code:

- Get a dial tone.
- Press the Station Speed (STASP) key twice, or dial # # 3.
- Dial the station speed code (0-9).
- Dial the extension number, or dial 9 and the outside number.
- Hang up.

To make a station speed call:

- Get a dial tone.
- Press the Station Speed (STASP) key, or dial FLASH # 3.
- Dial the station speed code.

## OTHER TELEPHONE SERVICES

### Account Codes

Account Codes (AC) are 5-digit codes preceded by \* 2 which are used to charge a call to a particular BNL account from any telephone at BNL. ACs are assigned a COS 50. When used to place a call, the AC raises the COS of the phone from which the call is made for the duration of the call. An accessible phone in a Lobby area, for example, with a COS 5 (on-site service only) can be used to place an off-site call if a valid Account Code is used. To use an Account Code 12345, dial \* 212345 plus the outside number (1+ area + 7 digits). If the AC used is invalid the caller will hear a hi/lo tone.

Typical applications for this feature include preventing abuse of telephones that must permit off-site access but are located in easily accessible areas. They also simplify billing for telephones located in experimental areas and are used by several groups with different accounts.

To request an Account Code, contact Telecom Services on Ext. 2000. The approval of the user's Dept. or Div. is necessary.

### Electronic Mail (Labmail)

ITD maintains a machine, bnl.gov, which provides mail forwarding services for BNL. This enables people to be addressed by a short name such as 'jdoe@bnl.gov', rather than the actual location where they receive mail, such as 'doe@ether.phy.bnl.gov'. By registering for this short address, users have an easier e-mail address to remember. And, if they should move their mail to a different address, such as 'johnd@proton.phy.bnl.gov', they need only change their forwarding address in Labmail. All subsequent mail will be forwarded to this new address.

To register for Labmail, send an e-mail message to 'register@bnl.gov', including your full name, life number, and the primary and secondary names you would like to be known by. For instance, from the machine ether.phy.bnl.gov, John Doe would send a message of the form:

To: register@bnl.gov  
Subject: Labmail registration

John Doe  
01234  
jdoe johnd

You can find more information on Labmail at [www.itd.bnl.gov/mail/labmail.html](http://www.itd.bnl.gov/mail/labmail.html) or call the ITD Help Desk on Ext. 5522.

### Facsimile Service

There is a facsimile (FAX) machine at the BNL Mail Room in Bldg. 179 for transmitting or receiving official material. It is available for transmission during normal working hours, and for reception at any time. The number for this FAX machine is 1-631-344-3000. In addition, FAX machines in individual Departments and Divisions appear in the Organizational Listings. Fax numbers are also in the white pages for individuals when available.

### Laboratory Paging System

The Laboratory has an on-site paging system, limited to a 25 mile radius. It is maintained by the Instrumentation Division. For more information on Laboratory Pagers, please call George Walczyk on Ext. 4243.

To call a Laboratory pocket pager, dial 3456, wait for a 2-second burst of tone, and then dial the 4-digit pager number. You will hear a series of short beeps after which

- a) For voice pagers (numbers beginning with digits 0-3); say your name and number and deliver a brief message. Hang up.
- b) For digital pagers (numbers beginning with digits 4 - 7); dial the telephone number you wish the party to call. Hang up.

Pager numbers are listed under names in the white pages of this directory.

### New Installations, Changes, and Disconnections

Installations, changes, or disconnections must be requested by submitting an ILR to Telecom Services, ITD, Bldg. 515, which will issue all orders to telephone service providers and to the proper Telecommunications Contractor. It is strongly suggested that such requests are made as early as possible to provide time for adequate planning, processing, and installation.

## **Reporting Telephone Equipment Trouble**

All telephone troubles should be reported immediately to Siemens Communications at Ext. 4031.

## **Telexes/Mailgrams and Facsimiles**

During working hours, Telexes/Mailgrams and Facsimiles are handled by the Mail Room in Building 179. At other times, dial Western Union at 1-800-325-6000 for personal telegrams, cables, and all money transfers.

## **Telephone Directory**

The Laboratory Telephone Directory is published every other year. A master telephone-database containing listings of individual employees is maintained by designated personnel in each BNL organization and is used in preparing the annual telephone directory. The representatives are listed on-line through the Inform System at url [http://inform.bnl.gov/BNL\\_ONLY/phonereps.html](http://inform.bnl.gov/BNL_ONLY/phonereps.html). Each department is responsible for maintaining their directory information.

The Telephone Directory also is available on-line, through BNL's Home Page at <http://www.bnl.gov/directory/>

## **Videoconferencing**

Two ISDN-based videoconferencing systems are maintained in ITD, in Bldgs. 515 and 510, for BNL users. Most DOE facilities and many non-DOE facilities are reachable through standards-based gateways maintained by ESnet. BNL is also AT&T certified to interconnect with other facilities using nonstandard protocols. This is a billable service, so please call Ext. 8100 or check our WEB page at [http://www.itd.bnl.gov/video\\_conf](http://www.itd.bnl.gov/video_conf) to get current pricing information.

For information and reservations call Ext. 8100 or send e-mail to [VIDEO-CONF-L@BNL.GOV](mailto:VIDEO-CONF-L@BNL.GOV). Also, check our WEB page at [www.itd.bnl.gov/video\\_conf](http://www.itd.bnl.gov/video_conf).

## **Wireless Services**

Telecom Services is responsible for providing cellular phones, nation-wide digital pagers and accessories. We are affiliated with several wireless-service providers, and are able to offer a variety of programs to meet your needs. For more information, call Telecom Services at Ext. 2000.

# BOMB THREAT CHECKLIST

## DESCRIPTION OF CALLER'S VOICE:

- Male \_\_\_\_\_ Female \_\_\_\_\_  
Young \_\_\_\_\_ Middle Aged \_\_\_\_\_ Old \_\_\_\_\_
- |                                   |   |
|-----------------------------------|---|
| <input type="checkbox"/> Calm     | <input type="checkbox"/> Nasal          |
| <input type="checkbox"/> Angry    | <input type="checkbox"/> Stutter        |
| <input type="checkbox"/> Excited  | <input type="checkbox"/> Lisp           |
| <input type="checkbox"/> Slow     | <input type="checkbox"/> Raspy          |
| <input type="checkbox"/> Rapid    | <input type="checkbox"/> Deep           |
| <input type="checkbox"/> Soft     | <input type="checkbox"/> Ragged         |
| <input type="checkbox"/> Loud     | <input type="checkbox"/> Cleared Throat |
| <input type="checkbox"/> Laughter | <input type="checkbox"/> Deep Breathing |
| <input type="checkbox"/> Crying   | <input type="checkbox"/> Cracked Voice  |
| <input type="checkbox"/> Normal   | <input type="checkbox"/> Disguised      |
| <input type="checkbox"/> Distinct | <input type="checkbox"/> Accent         |
| <input type="checkbox"/> Slurred  | <input type="checkbox"/> Familiar       |

If voice is familiar, who did it sound like \_\_\_\_\_  
\_\_\_\_\_

## BACKGROUND SOUNDS:

- |   |  |
|---|--|
| <input type="checkbox"/> Street noises    | <input type="checkbox"/> Factory machinery |
| <input type="checkbox"/> Crockery         | <input type="checkbox"/> Animal noises     |
| <input type="checkbox"/> Voices           | <input type="checkbox"/> Clear             |
| <input type="checkbox"/> PA System        | <input type="checkbox"/> Static            |
| <input type="checkbox"/> Music            | <input type="checkbox"/> Local             |
| <input type="checkbox"/> House noises     | <input type="checkbox"/> Long Distance     |
| <input type="checkbox"/> Motor            | <input type="checkbox"/> Booth             |
| <input type="checkbox"/> Office machinery | <input type="checkbox"/> Other             |

## THREAT LANGUAGE:

- |   |   |
|---|---|
| <input type="checkbox"/> Well spoken (educated) | <input type="checkbox"/> Incoherent Taped       |
| <input type="checkbox"/> Foul                   | <input type="checkbox"/> Message read by caller |
| <input type="checkbox"/> Irrational             |   |

## GENERAL:

Time Call received \_\_\_\_\_  
Time Caller Hung Up \_\_\_\_\_  
Date \_\_\_\_\_  
Person receiving/monitoring call:  
\_\_\_\_\_  
Phone number at which call was received:  
\_\_\_\_\_

## EXACT WORDING OF THE THREAT:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

## KEY QUESTIONS TO ASK:

1. Where is bomb right now?  
\_\_\_\_\_
2. When will it explode?  
\_\_\_\_\_
3. What does it look like?  
\_\_\_\_\_
4. What kind of bomb is it?  
\_\_\_\_\_
5. Why did you place it?  
\_\_\_\_\_
6. What will cause it to explode?  
\_\_\_\_\_
7. What is your name?  
\_\_\_\_\_
8. What is your address?  
\_\_\_\_\_
9. Are you part of an organization?  
What is it? \_\_\_\_\_
10. Why are you warning us?  
\_\_\_\_\_
11. Do you realize that innocent people could be hurt or killed?  
\_\_\_\_\_

**REPORT CALL IMMEDIATELY TO  
BNL POLICE - DIAL 911, 2222, OR 2238**

-----  
**DATE** \_\_\_\_\_ / \_\_\_\_\_ / \_\_\_\_\_  
**NAME** \_\_\_\_\_  
**POSITION** \_\_\_\_\_  
**PHONE NUMBER** \_\_\_\_\_

# Emergency Signals

In an emergency  
**call 911**

**If you are using a cell phone call 631.344.2222.**

## Building Fire Alarm Bells

### **Any ringing of fire alarms**

Or upon notification by Local Emergency Coordinator, evacuate the building immediately.

## Site Sirens

### **Continuous sounding of site sirens for five minutes**

Proceed immediately to the Building Assembly Area. Await instructions which may include the nature of the emergency, the type, sequence, and routes for evacuation.

### **Intermittent sounding of site sirens for five minutes**

Evacuate the site immediately.

## Evacuation Zones & Routes

**See map on page 89.**
