Notes: Births to unmarried women in the United States for 1940 – 1979 are estimated from data for registration areas in which marital status of the mother was reported; see sources below. Beginning in 1980, births to unmarried women in the United States are based on data from states reporting marital status directly and data from non-reporting states for which marital status was inferred from other information on the birth certificate; see sources below. Data for 1998 are preliminary.
