

**Information and Instructions**

**Instructions for Schedule for Leases/Subleases that Involve an Undefined  
Geographic Area  
FCC Form 603-T, Schedule G**

This schedule must be completed and attached if spectrum in an undefined area is to be Leased/Subleased, as specified by Item 3 on Schedule F. Complete and attach a copy of Schedule G for *each* Call Sign affected by the Lease/Sublease. If multiple undefined areas are requested, *each* undefined area should have a corresponding Schedule G.

This schedule further defines geographic areas that have not been defined by the FCC. It is used to enter the coordinates of locations that describe the periphery of a geographic area to be Leased/Subleased. Specifically, enter up to 120 pairs of latitude/longitude coordinates, one pair for every 3 degrees azimuth around the periphery. Coordinates of the specified locations must be referenced to the North American Datum of 1983 (NAD83).

**Note:** If the area of the spectrum to be leased/subleased is a defined geographic shape, fewer than 120 coordinates can be provided, in which case the FCC will assume that these coordinate points are joined by straight lines. For example, a rectangle can be described by four coordinates, a hexagon by six coordinates, and so on.

Latitude: In this column, enter the latitudes of locations using the format *DD-MM-SS.S-D*, where the degrees (*DD*) term can have a value in the range of 0 to 90, minutes (*MM*) can range from 0 to 59, seconds (*SS.S*) can range from 0 to 59.9, and the direction (*D*) term is either N for North or S for South.

Longitude: In this column, enter the corresponding longitudes of locations using the format *DDD-MM-SS.S-D*, where the degrees (*DDD*) term can have a value in the range of 0 to 180, minutes (*MM*) can range from 0 to 59, seconds (*SS.S*) can range from 0 to 59.9, and the direction (*D*) term is either E for East or W for West.

**Certifications**

By signing the Main Form, FCC Form 603-T, the Licensee and Lessee/Sublessee certify that the applicable statements listed in this schedule are true, complete, correct, and made in good faith.

**Schedule for Leases/Subleases that Involve an Undefined Geographic Area**

For each undefined geographic area, complete up to 120 Latitude/Longitude combinations for every 3 degrees azimuth, using NAD83 Datum

	Latitude (DD-MM-SS.S-D)	Longitude (DDD-MM-SS.S-D)		Latitude (DD-MM-SS.S-D)	Longitude (DDD-MM-SS.S-D)
