FAS Quarterly Reference Guide To World Horticultural Trade: *World Production, Supply, and Distribution of Key Products*

Almonds Top U.S. Exports of Horticultural Products

Total U.S. shipments of horticultural products in fiscal year (FY) 2003 (October 2002-September 2003) were valued at \$11.9 billion, up 7 percent from FY 2002. Sales of tree nuts, led by almonds, were up 21 percent to \$1.49 billion. Other major categories with increased exports included essential oils (up 25 percent to \$958 million), other fresh fruit (primarily strawberries, the total up almost 26 percent to \$299 million), wine (up 19 percent to \$617 million), and processed fruit (up 13 percent to \$124 million). Canada continues to be the top market for U.S. horticultural exports, with combined sales in FY 2003 reaching \$3.8 billion, 7 percent more than in FY 2002. U.S. horticultural exports to the EU rose about 10 percent to \$2.21 billion, while sales to Japan were up 2 percent to \$1.57 billion. Exports to Mexico, our third-largest single country market, were up 9 percent to \$1.1 billion. Almonds continue to lead U.S. horticultural exports, followed by wine, table grapes, fresh apples, and frozen potato fries. Expansion of the international fast-food industry, high product quality, rising incomes, tariff reductions, and ongoing Market Access Program activities should continue to drive demand for U.S. horticultural products.

HORTICULTURAL & TROPICAL PRODUCTS DIVISION STAFF

CONTACT	PHONE	PORTFOLIO
FRANK TARRANT	720-6590	DIRECTOR
STACY GEHRT Administrative Assistant	720-6590	
SHARON MCCLURE	720-7931	DEPUTY DIRECTOR FOR MARKETING

Note to **Subscribers** to the *FAS Quarterly Reference Guide to World Horticultural Trade*

The Trade Policy Edition of the 2003 *FAS Quarterly Reference Guide to World Horticultural Trade*, originally scheduled to be published on October 1, 2003, has been delayed. We now anticipate that this issue will be published by February 27, 2004.

The proposed schedule for the 2004 issues of the *FAS Quarterly Reference Guide to World Horticultural Trade* is as follows:

1. Production, Supply, and Distribution Edition (January 30, 2004) publication including 5 years of Production, Supply, and Distribution Data for over 30 products. Additional information is available on the web at: <http://www.fas.usda.gov/psd/>
2. Charts Edition (April 1, 2004)- illustrating major trade trends, country features, and commodity features
3. Trade Data Edition (July 1, 2004)
4. Trade Policy Edition (October 1, 2004)

These four publications replace the written monthly publication *World Horticultural Trade and U.S. Export Opportunities*.

The analytical articles formerly published in *World Horticultural Trade and U.S. Export Opportunities* will now be updated on the Horticultural and Tropical Products Division Homepage at: <http://www.fas.usda.gov/http/> according to this schedule:

Horticultural and Tropical Products Division

2004 Internet Update Schedule By Month

Note: Crop year refers to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown.

1/ In Italy, "consumption" includes fruit withdrawn from the market under the EU price support program.

Note: Crop year refers to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. For Gaza and South Africa, data includes small quantities of tangerines. For the United States, the data includes temples.

1/ In Greece, Italy, and Spain, "consumption" includes fruit withdrawn from the market under the EU price support program.

Note: Year refer to the marketing period, which usually begins in the fall for the Northern Hemisphere and corresponds to the harvesting and marketing period for fresh citrus. For the Southern Hemisphere, the orange harvest occurs entirely during the second year shown and includes all processed orange juice whether or not concentrated. One metric ton of 65 degrees brix equals 344.8 gallons at 42 degrees brix and 1,405.88 gallons at single-strength equivalent.

Note: Crop years refers to the harvest and marketing period, which usually begins in the fall and extends to the spring. This corresponds roughly to October-June in the Northern Hemisphere and April-December in the Southern Hemisphere. For the Southern Hemisphere, harvest occurs almost entirely during the second year shown. The harvest of limes usually begins earlier and often extends throughout the year.

1/ Mostly limes but some sour oranges and other varieties.

2/ In Italy and Spain “consumption” includes fruit withdrawn from the market under the EU price support program.

3/ Summer oranges (Natsu mikan or natsu daidai, a hybrid of mandarin with sour orange or pomelo).

4/ Limes.

5/ Sour oranges.
