

**OIL SPILLS IN U.S. WATERS  
2001**

During 2001, some of the most significant oil spills included:

- November 7, 2001 - While waiting to enter the McAlpine lock and dam on the Ohio river, the tank barge *WTC 105* was moored along a guide wall. At that location, three of the barge's starboard cargo tanks were damaged by an unknown object, below the waterline. Approximately 124,320 gallons of gasoline was discharged into the Ohio river.
- February 9, 2001 - While conducting an emergency surfacing drill, the submarine *USS GREENEVILLE* collided with the Japanese training ship *EHIME MARU*, which sank quickly. *EHIME MARU* was carrying approximately 65,000 gallons of diesel fuel and lube oil at time of sinking, which is presumed spilled in the Pacific Ocean.
- September 22, 2001 - The Liberian flag tank ship *NEW AMITY* collided with the tank barge *NMS 1486*, while navigating in the Houston Ship Channel. As a result, approximately 50,000 gallons of intermediate fuel oil was spilled into the waterway.
- September 16, 2001 - Approximately 42,000 gallons of crude oil condensate was discharged into West Lake Verrett, Louisiana from an oil production platform. The reported cause of the spill was an open valve in a storage tank.
- August 4, 2001 - The fishing vessel *WINDY BAY* grounded near Olsen Island, Prince William Sound, Alaska. Wave action caused the vessel to break free of the rocks and to sink in approximately 1000 feet of water. Approximately 35,000 gallons of diesel fuel was discharged.
- March 14, 2001 - The *M/V GENMAR HECTOR* was blown off of an oil facility dock in Texas City, Texas. The vessel's motion broke two loading arms on the facility that were attached to the vessel for offloading operations. Approximately 30,635 gallons of crude oil was discharged from the two broken loading arms.

**CHEMICAL SPILLS IN U.S. WATERS (in gallons)  
2001**

During 2001, the liquid chemical spills included:

- About August 7, 2001 - The tank barge *SCC-100*, fully loaded with 98% pure sulfuric acid, was moored in a fleeting area near Houston, Texas. The barge developed a hole in its stbd tank, which allowed acid to drain into the void where it ate several large holes in the bottom of the barge. Approximately 200,049 gallons of sulfuric acid was released into the water.

**CHEMICALSPILLS IN U.S. WATERS (in pounds)  
2001**

During 2001, the most significant non-liquid chemical spills included:

- August 6, 2001- The tank ship *ATLANTIC SWAN* discharged approximately 168625 pounds of toluene into the Houston Ship Channel, while transferring the product to a shoreside facility. The reported cause of the spill was an open overboard discharge valve.
- January 11, 2001 - Approximately 121,500 pounds of phosphoric acid was spilled into a tributary of the Houston Ship Channel when the dike surrounding a pond failed. The pond belonged to a fertilizer plant.
