

Take Charge of Your Universe. Take Charge of Your Health!

"I got a lot more than just my smile from my mom! Long before I became Miss USA® 2003, she taught me to be smart about taking care of myself, no matter how busy we get with family, travel and jobs. So do what we've done!

Go to the Women's Cancer Network Web site to assess your risk for gynecologic and breast cancers, diseases which affect more than 300,000 women of every age and background every year. *The Miss Universe Organization encourages all women everywhere to take this FREE online test.* It could save your life...or your mom's...or your friend's. What could be smarter than that?"
