¹ Data are not shown when the labor force base does not meet BLS publication standards of reliability for the particular area, based on the sample in that area. See appendix B.

² Less than 500 persons or 0.05 percent.

NOTE: Distributions do not necessarily sum to 100.0 percent, due to rounding. Data for demographic groups are not shown when they do

not meet BLS publication standards of reliability for the particular area based on the sample in that area. See appendix B. Items may not add to totals because of rounding. Detail for race and Hispanic-origin groups will not add to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups.
