

# “Immunization Techniques: Safe, Effective, Caring”

Every clinic that delivers vaccination services should have a copy of this 35-minute video developed by the California Department of Health Services. It teaches best practices about how to administer IM and SC vaccines to infants, children, and adults. It is designed for use as a “hands-on” instructional program for new staff as well as a refresher course for experienced health professionals. Each video comes with presenter’s notes and includes a skills checklist.
