Do you know how to prepare your home or yard for a pesticide treatment ?

Read the Label First!

Follow label instructions to help you apply pesticides safely!

Alternatives ???  
Choices ???

## Info for everyone— in every environment!

### Talk with us! Seven days a week!

No matter where you're using pesticide products—home, yard or garden—you need to take the proper precautions and necessary actions to keep your kids, family, pets, and others safe.

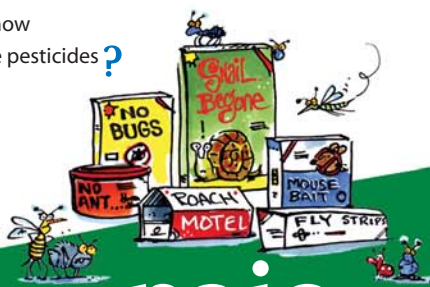

When you call NPIC, you'll talk with real, live specialists who can answer your questions and translate all the scientific lingo about pesticides into information that helps you make informed decisions.

### Our "user-friendly" scientists will help you:

- understand the technical/chemical information on the labels
- assess toxicity and risks
- explore possible alternatives
- learn about safe-use practices
- identify the signs of pesticide poisoning
- obtain general information on pesticide regulations

Did you know that baits are pesticides ?

### We'll also help you find assistance with:

- emergency treatment for humans and animals
- pesticide clean-up and disposal
- laboratory analyses
- pesticide incident investigation

### NPIC provides pesticide information to:

- general public
- health care providers, physicians, veterinarians
- local, state, and federal agencies, including school districts

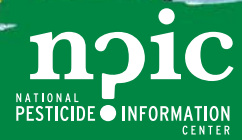

### Call us now!

NPIC is the national pesticide information resource for people like you who want to make informed decisions about pesticides in order to keep your kids, family, pets and others safe.
